

One Challenge Global Research Team

The **Global Research Team's** mission and passion is to assist field workers, churches, and ministry partners to gather and analyze information to develop effective ministry strategies. This "knowledge stewardship" is the Spirit-led process of acquiring and insightfully using information for God's glory and according to His purpose. They examine how God is already at work, and then determine what can be done next to further His kingdom in a people group, city, country, or region.
